

Progressive-Labor Speakers Fired Opening Gun Here on Monday.

Cooto and Irvine Give Their Views on Political Questions
—Want Banking System Changed—Offset National
Debt by Socializing Credit of Canada.

The opening gun of the political campaign in Coleman was fired by the Progressive-Labor speakers, Mr. G. G. Cooto, assisted by Mr. Wm. Irvine, Labor candidate for East Calgary, in the Opera House here on Monday afternoon. The meeting was well attended and was presided over by Mr. Wm. Hayson.

Mr. Irvine was the first speaker and received a good reception. His opening remarks dealt with the hardships experienced by Labor in selecting candidates to parliament owing to the old line parties as arranging constituency boundaries that the Labor vote was badly split. His main themes were: The socialization of the means of production and distribution of wealth; The group system of representation; Democratic organization instead of autocratic organization.

He enlarged on the group idea of representation at some length, stating that each group in the industrial field should have its own representative in parliament in order to properly look after their particular interests. He scored the Conservatives and Liberals, and said it did not make any difference to Labor which party was in power. Labor must work out its own salvation by means of the ballot box. The speaker was of the opinion that Labor's interests in this particular constituency could be best served by a Farmer-Labor combine.

He dealt with the question of the national debt, and advanced the view that this could be reduced by socializing Canada's credit. He paid a glowing tribute to Mr. Cooto for the fight put up at Ottawa during the time the Bank Act was up for revision.

The speaker said the matter of freight rates and immigration could be handled best by Labor and Farmer, as they were the only parties who would face these important questions and solve them. He saw no sense in bringing additional

population to Canada until such time as what is already here were all employed.

Mr. Cooto was well received, and in opening dealt in a critical vein with many things the Prime Minister was reported to have said in recent speeches. He spoke in a humorous way about the tariff, and said it was not a very important question, although both Conservatives and Liberals talked a lot about it.

To his mind the present banking system in Canada was the chief cause of all our troubles. Four or five boards of directors composed of money barons in the East, really governed Canada, and until this condition was remedied it was useless to look for any improvement. The speaker advanced the opinion that Canada should have a federal reserve bank like they have in the United States, and that our currency should be issued by the government instead of by the banks as at present.

Mr. Cooto said the government had spent many millions of dollars on the Quebec harbor and the new Welland Canal. He gave a short resume of his four year's work at Ottawa, stating he had devoted a lot of time to the banking question, also he had attempted to get the tariff reduced on automobiles. He had also taken up the matter of leasing Indian reserves on behalf of the Indians with the Hon. Charles Stewart, but had not received a very satisfactory reply in regard to this question.

He appealed for support at the polls on Oct. 20th on his next record. If any present did not think he deserved their support they were free to vote for either of the other candidates. The speaker was applauded on resuming his seat. Before the meeting broke up it was suggested a committee from the local union be organized to assist Mr. Cooto in his campaign.

Mr. Frank Wheatley, of Blairmore, was a visitor to Coleman on Monday.

Mr. G. G. Cooto, Progressive candidate of Calgary, was in Coleman Monday of this week.

Mr. and Mrs. H. C. McNair left Friday last by auto for Calgary and other points in the north country where they will visit for a week or two.

The Washington Senators with Walter Johnson pitching, defeated the Pittsburgh Pirates with Meadows hurling, in the first game for the world's series held in Pittsburgh yesterday, by a score of 4-1.

Chas. Pingle, Liberal, of Medicine Hat, is elected to the legislature with a majority of 396 over the runner-up W. E. McComb, Farmer Labor candidate, according to the returns as given out by the returning officer yesterday.

Heavy Registration at Varsity
Alberta University is receiving a heavy registration for the coming term. The number of students in attendance is likely to exceed last year's total of 1850.

Mrs. Lauce Morgan and Miss Maquis, of Blairmore, were guests of Mrs. G. R. Powell Wednesday yesterday, while Miss Maquis will spend the week end with her hostess.

Mr. and Mrs. Luke Lindro returned to Coleman on Sunday last, and have taken up their residence in their new home at Park Terrace.

Good Building Record
One million dollars in building permits in the past nine months is the record at Calgary which is a considerable increase over last year's record.

Western Picture
The Western Pictures company, an all Canadian concern, has been engaged during the past week filming scenes in the buffalo park at Watrous in connection with the picture, "Poisoning the Plains." This film covers the story written by Rev. R. G. McBeth of Vancouver.

LOCAL, PERSONAL AND GENERAL NEWS

Mr. P. M. Christophers, M.P.P., of Blairmore, was a visitor to Coleman on Monday.

Mr. John Herron, Conservative candidate of Pincher Creek, was in Coleman on Monday.

To Take Over Poultry Marketing Plant

Arrangements for the taking over of the provincial government poultry marketing plant by the provincial poultry pool are under way between the officials of the pool and Hon. Geo. Hoedley, Minister of Agriculture. This service has been in operation for some years, and has formed a substantial nucleus for the new pool.

The C. G. I. T. group of the United Church held a most successful social on Monday evening. It was a get to gether party. Eighteen girls had a very sociable time. Games, competitions, charades, etc., made up a fine program and the refreshments were plentiful and delicious. The mid-week program of the group has Miss C. K. Allan for its leader.

Summit Lodge, A. F. & A. M., will hold a whist drive and dance in the I. O. O. F. hall on Thursday, October 15th, commencing at 8 p. m. Members of the Eastern Star and families invited.

*** Many Homesteads Filled On**
A total of 71 homesteads were filed on during the month of September in the Edmonton land district, which includes a large territory in central and northern Alberta. In addition to this 11 soldier grants were filed on.

Mr. Frank Wheatley, of Blairmore, was a visitor to Coleman on Monday.

Mr. G. G. Cooto, Progressive candidate of Calgary, was in Coleman Monday of this week.

Mr. and Mrs. H. C. McNair left Friday last by auto for Calgary and other points in the north country where they will visit for a week or two.

The Washington Senators with Walter Johnson pitching, defeated the Pittsburgh Pirates with Meadows hurling, in the first game for the world's series held in Pittsburgh yesterday, by a score of 4-1.

Western Picture
The Western Pictures company, an all Canadian concern, has been engaged during the past week filming scenes in the buffalo park at Watrous in connection with the picture, "Poisoning the Plains." This film covers the story written by Rev. R. G. McBeth of Vancouver.

Liberal committee rooms have been opened this week in the rooms over Leosky & Leden's store, Main street.

Attention is drawn to the advertisement of G. R. Powell, jeweler, which appears on the back page, offering some splendid bargains in Victor Victrolas for a limited time only.

A large delegation from Summit Lodge, A. F. & A. M., journeyed to Pincher Creek on Wednesday to attend a district meeting of the Masonic lodge.

Winners at the whist drive held by the Rebekah's last Saturday were: Mrs. W. Antel, 1st; Mrs. G. Dickson, consolation; Mr. J. D'Andra, 1st; Mr. R. Evans, consolation. A large number attended and all enjoyed a very pleasant evening.

Mr. J. D. Gillis, vice-president of the M. W. U. of C., left for Calgary on Tuesday, where he will open up headquarters offices for the new miners organization.

One of the most pleasant social events of the season took place on Tuesday evening in the Knights of Pythias hall, when Mr. and Mrs. C. W. MacKinnon were at home to their many friends. Some sixty invited guests spent a very enjoyable evening with music, dancing and cards. Delightful refreshments were served at the supper hour.

Mr. and Mrs. J. McLeod have moved into their new home on Park Terrace.

Liberal Meeting Friday

A public meeting of the supporters of T. C. Milnes, Liberal candidate for the federal constituency of Macleod, will take place in the Grand Theatre on Friday afternoon at 2:30 p. m. The speakers will be the Hon. Charles Stewart, Minister of the Interior and Mines, the Hon. C. R. Mitchell, provincial Liberal leader, and the candidate Mr. T. C. Milnes.

Immediately after this meeting the Hon. Charles Stewart is to hold a conference with the miners of the district, when matters of import ance to those engaged in the mining industry will be up for discussion.

Local W. I. Hold

Interesting Meeting

The regular meeting of the W. I. met at the home of Mrs. W. Burns, 4th street.

The amount collected for the school fair was \$178.50, amount given in prizes \$134.75, leaving on hand \$43.75, which was handed to the School Fair secretary, Miss Yuill.

The W. I. regret that the exhibits were removed so hurriedly, not giving the public opportunity to see them and if we take over the organization another year we will see that the booths are properly guarded.

Roll call was something seen on vacation and was answered by all.

The next meeting will be at the home of Mrs. W. Johnston at which we will have a "Country Store," everything to be worth 50c at least. Proceeds to go to the Swimming Pool fund.

Mrs. Allan gave the report from the constituency conference at Calgary. Mrs. W. Johnston gave a paper on Citizenship which was enjoyed by all.

TARIFF AND TAXATION

(Toronto Star)

One claim the high tariff men make is that the protective tariff gives industrial workers high wages. But at times it is shown that it only does that after it has abundantly done something else—handsomely rewarded the capital invested in the protected industry. The tariff is made to ensure profits before anything else is asked of it, for profit is the favorite child of the tariff.

Before dividends are cut there is if possible a cut in wages, or the factory force is reduced, or the plant works part time. The promise the tariff makes to wage-earners is a secondary one and conditional upon the tariff giving capital and management the prosperity they count upon. But whether the wage-earners get these high wages or not, they help to pay on the higher cost of living the taxation which the tariff imposes on every inhabitant of the country. The word "tariff" means "taxate," but it is much preferred as a softer word than the other. It is a tax which ever and always must shoulder the obligation to justify its continuance by its observable and known effects. Those who would "take it out of politics" merely mean that they would like to relieve it of this obligation to show cause why this taxation of the people for the benefit of urban industries should not be stopped.

The textile industries of the United States and the protectionist Republican party at Washington have trouble on their hands just now because the supposed benefit of the high tariff to the wage earners is not evident. The textile industries of New England enjoy protection up to the hilt, and yet the mills have reduced wages ten percent, and some mills have closed down. Why has high protection failed to keep the mills open and wages up?

The St. Louis Post-Dispatch asks: "If the tariff has failed to protect American wages and standards of living, but has inflated the costs of the workingman's clothing, why should it be continued?" William Green, president of the American Federation of Labor, declares:

"If a tariff wall is built in order to protect special interests and special industries against competition from foreign manufacturers, certainly when manufacturers protected by such a tariff wall reduce the wages of their employees below the subsistence level, the Government, in all fairness, should reduce the tariff schedules and tear down the tariff wall which has been so skillfully built. It is the purpose of the president of the American Federation of Labor to bring these facts to the attention of Congress, and to insist in the name of the working people of America that the textile manufacturers who have inaugurated and carried out a policy of wage reductions shall be deprived of special privileges and special benefits which they have enjoyed from high tariff protection."

This attitude on the part of organized labor is causing the protected interests a great deal of anxiety. It shows the wage-earners are beginning to think seriously about a policy they were expected to cheer for unreflectingly. The agriculturists of the northwestern states are already weary of a protectionist policy which yields them nothing and taxes them on everything they buy. "It," says the New York World, "organized labor and agriculture join hands against protection, the movement will be formidable."

There is, if possible, an even more dangerous manifestation against high tariff in the United States. Many great new industries which have grown up in the United States in recent years want no tariff protection at all, will do nothing to help maintain it, will, no doubt, presently seek to abolish it. These newer industries, going in for quantity production, want the world for a market, but find that, all over the world the high tariff policy of the United States causes them to meet with hostility. The motor industry of the United States, the film, radio, structural steel, cash register, typewriter, phonograph, and all such industries, are either steadily growing indifferent to the high tariff as of no use to them, or are already hostile to it as injurious to them in their search for world trade.

The significance of this in the week it makes in the ranks of the interested. When great industries in which hundreds of millions are invested refuse to sit in with the beneficiaries of protection, or, worse still, go out to oppose them, a new state of affairs is brought about.

Former Coleman Boy Wins Silver Cup

New Mine Union To Name Officers

On November 30

Chellis Easton is the proud possessor of a handsome silver cup, that he won at the Ventura county fair, for the best poster, relating to California. A vessel, representative of the type used by Sir Drake, and early adventurers, appears on the poster, entitled, "Early Explorers." The poster and the cup are on display at the Woodrow Wilson school today. Chellis is only eleven years old. His cup is identical with that awarded Santa Paula high school, for the best poster submitted from classes nine to twelve. Chellis competed with work from elementary schools throughout the entire county.

The above clipping taken from a Ventura County, Calif., newspaper, will be of interest to many Coleman people. Chellis Easton is a son of Mr. and Mrs. Alex. Easton, former residents of Coleman, now residing in California, and a grandson of Mr. and Mrs. R. Easton and Mrs. J. L. Lonsbury of Coleman.

Mr. O. E. S. Whitelaw returned Thursday morning from a trip to Winnipeg.

Local Branch G.W.V.A. at Home to Members and Guests

On Thursday evening of last week the local branch of the Great War Veterans Association gave a smoker and concert for their members and about thirty invited guests from the various towns in the Pass.

The evening's entertainment was opened with an address by Mr. Davies, president of the local branch, which was followed by the entire audience rising and standing in silence for a few moments in honor of their fallen comrades.

The Coleman Town Band opened the musical program with a selection and also gave other numbers during the evening, all being well rendered and much appreciated. Other artists who assisted with the program were: Messrs. Davies, Lann, Merriam, Warren, Hilly, Skuse, Whitlock, Tory, Seddington and Goodwin.

All those present decided the affair a splendid success and passed a vote of thanks to the executive for the able manner in which everything had been carried out, and the hope was expressed that in the not so distant future a similar gathering would take place. All heartily joined in singing "God Save The King."

John Herron, Conservative Candidate Addressed Miners Last Sunday

Mr. John Herron, who had previously addressed a meeting of miners at Blairmore, motored here on Sunday afternoon and addressed the local union after they had finished their weekly session. The meeting took place in the Grand theatre.

Mr. Harry W. Clark acted as chairman, and after the usual introductory speech Mr. J. Herron outlined the policy of the Conservative party if returned to power, and, in particular, dealt upon the problem of coal production.

He was listened to with much attention, and at the conclusion of his brief speech, answered in a satisfactory manner to the inquiries, all questions addressed to him, which all bore upon the coal problem.

Bring British Immigrants In

There are many questions affecting national policy in Canada in regard to which it is natural there should be wide divergences of opinion, but there is one subject, immigration, upon which it should be possible to find common ground. East and West and the Maritimes may differ in regard to tariff schedules, freight rates, railway construction policies, and harbor improvements, but one and all are vitally interested in the question of population and in taxation problems.

Every Province in Canada still possesses large areas open to settlement, and only awaiting people to bring them under cultivation and thus render them productive and a source of national wealth. Even the most thickly settled rural districts in Canada are capable of sustaining a denser population through more intensified farming, while in Northern Ontario and Quebec and in all four Western Provinces there are vast unpopulated areas.

On the other hand, there are some millions more people in the British Isles than there are avenues of employment open to them. The British Government is therefore obliged to support these people in idleness, while the population goes on increasing at a greater rate than the capabilities of the country to employ and support. Nor, in the changed industrial conditions which have resulted from the war, does there seem to be any possibility of a material improvement in this situation.

In times past the United States absorbed large numbers of immigrants from the British Isles, but under its quota system the doors of the big American republic are now practically closed. There is a good and sufficient reason for this new United States policy. Population across the line has now reached over 110,000,000, and the annual natural increase is 1,500,000. In other words, every recurring decennial census shows an increase in population of 15,000,000. Before long the figure will be 25,000,000. By far the larger portion of this increase is in the cities, with the result that the United States is rapidly reaching the point where it will no longer be a self-contained and self-supporting nation able to feed its own people. It has, therefore, and quite naturally, called a halt to immigration.

Canada, however, occupies an entirely different position. Our population is small and our territory large, and for the most part unsettled. It is open to serious question whether Canada is morally justified in rigidly restricting immigration, and holding large areas unsettled and idle, when millions in the British Isles lack employment because there is none to be had.

Canada may feel that it is not called upon to contribute to the upkeep of the British Navy, and that it should not obligate itself to participate in the defense of the Empire as a whole, and in other respects should not be expected to adopt policies purely from an Empire standpoint. But situated as the Dominion is in the matter of population and vacant territory it can hardly be denied that, so long as it is a part of the Empire, it has some responsibility for the welfare of all British people.

At the present time Canada could render no better service to the Empire, and incidentally to itself, than by evincing and putting into effect a well-considered plan whereby a large number of people from the British Isles could be transferred to this Dominion.

Canada may feel that it is not called upon to contribute to the upkeep of the British Navy, and that it should not obligate itself to participate in the defense of the Empire as a whole, and in other respects should not be expected to adopt policies purely from an Empire standpoint. But situated as the Dominion is in the matter of population and vacant territory it can hardly be denied that, so long as it is a part of the Empire, it has some responsibility for the welfare of all British people.

Many Auto Accidents In United States

Records Show That Two Are Killed Every Hour In Day

The death rate in the United States due to automobile accidents leads the world, being 14.8 fatalities for every 100,000 population against 5.2 in England and Wales, 4.3 in Scotland, 4.6 in New Zealand and 3.6 in Canada during 1925. Figures for 1924 show that for 158 American cities, the automobile accident death rate was 19.4 per 100,000 population, causing not less than 17,400 deaths in automobile accidents, not counting accidents which involved railroads, or street cars, and automobiles.

The toll of human life taken by motor vehicles in the United States is at the rate of more than two for every hour in the day. These statistics have been compiled by the National Safety Council for consideration at the Fourteenth Annual Congress which opened at Cleveland on Sept. 25.

Neuralgia Conquered Its Pain Destroyed

Magical Results Come When You Apply

NERVILINE

It Acts Quickly

Mr. W. T. Greenway, formerly connected with the Outlook newspaper staff, has written: "For twenty years we have used Nerviline in our home, and for the world we know of no other. As a remedy for all pain, eczema, toothache, cramps and disordered stomach, I know of no preparation so useful and quick to relieve as Nerviline. Remember this, wherever there is pain, rub on Nerviline, and you will get prompt results—35c a full dozen."

Easy Job Pays Well

In London is one man who makes close to \$10,000 a year by advising other men on what to wear. If a man wishes to buy a complete outfit of clothing this gentleman accompanies him on his rounds of the shops and selects the proper colors, styles, etc.

This valuable preparation has been on the market for over 80 years, and has no equal for effecting the vomiting, purging and diarrhoea of cholera infantum. Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Orange Free State Is Rich

Scarcely Definitely British Just Twenty-Five Years Ago

The Orange Free State, which the Prince of Wales recently visited, is one of the "babies" of the British empire. It became definitely British only in 1900—just twenty-five years ago.

At this place, however, the Prince saw the "shining stones," as the Bushmen call the diamonds, dug out of the earth, washed, sorted and finally weighed.

The tunnels in the mines are lighted by electricity and ventilated by compressed air, while the machinery is some of the latest in the world.

The temptation among the workers to steal a diamond is great, yet few thieves occur.

Even if a native did steal a stone it would be of no use to him. He cannot sell it, or dispose of it easily, for all diamond dealers must be registered and licensed, and no black man dares to offer for sale a precious stone to a reputable white man.

Not only has the Orange Free State its mineral wealth. It possesses also some ten million sheep, one and a half million cattle, half a million Angora goats, a quarter of a million horses, and also over ten thousand ostriches!

B.C. Lumber Shipments

The total water-borne movement of British Columbia lumber for the first six months of the current year totals \$23,811,452 feet, as compared with \$20,090,568 during the corresponding period of last year. More than half of this movement, or 128,334,898 feet, went to the Atlantic coast.

SUNDAY SCHOOL LESSON

OCTOBER 11

PAUL IN CORINTH

Golden Text: Be not afraid, but speak and bid not thy peace. Acts 18:2.

Lesson: Acts 18:1-17. Devotional Reading: I. Corinthians 3:1-7.

The Text Explained and Illumined

Paul Supports Himself at Corinth by the Labor of His Hands, verses 1-3.—In A.D. 50, Pompey brought Jewish prisoners to Rome, and the settlement grew rapidly. Thierus deported four thousand Roman Jews to Sardania, the hope that the malaria might kill them. Claudius came to the throne in A.D. 41. He was indebted to Herod Archelaus of Jerusalem for help in gaining the throne, and at that time he was not deemed safe to permit other Jews to leave Rome. Suetonius, in his life the Emperor Claudius, gives another reason for the edict: It was "because they were in a state of continual mutiny at the instigation of Chrestus." It is thought that the Romans, hearing the name Chrestus, (Christ) who often, supposed him to be one of the leaders of the Roman Jews. "Suetonius no doubt means that the dissensions between Jew and Gentile had already arisen to such a height as to attract public attention and appear to threaten the public peace. Yet when the Jews were expelled from Rome scarcely twenty years had elapsed since the death of Christ. Paul did not arrive in Rome till ten years after this date. No other up-to-date medical college good seed had sprung up of itself. The great Roman church was founded by the apostle Peter. Today, the expression of a heathen historian, we should not have known that it was a strong, healthy church in the days of Emperor Claudius."

To Ship Many Cattle

The Liverpool Produce, Ltd., an Edmonton firm which shipped many cattle to the Old Country market last spring, plans now to finish 20,000 head of cattle for the British market, according to plans announced by the president of the company.

Grandmother: "Johnny, I wouldn't slide down those stairs." Johnny: "I know it. You couldn't."

From School Teacher To Great Eminence

A young man who was brought up on a farm in Western Pennsylvania studied diligently and qualified for district school teacher. Further pursuing his studies and teaching, he managed to save up enough money to go to the medical college. After the Civil War, he began the practice of medicine in the new oil section of Pennsylvania. Today, the name of the man to reach had relieve those who were afflicted with it. He was a student of anatomy, knew and could easily recognize most of the medicinal plants growing in the woods. Later, he moved to the West, where he launched his favorite remedy, and, in a short time, they were sold by every druggist in the land. Today, the name of the man, Dr. R. V. Pierce, is known throughout the world. His Golden Medical Discovery is the best known blood medicine and tonic. More than fifty million bottles have been sold. It is a fact that it is the "Discovery" in liquid or tablet form, you can obtain a trial pkg. of the tablets from Dr. R. V. Pierce, Branch Laboratory in Bridgeburg, Ont.

The Growth Of Radio

Ten Million Sets Predicted For U. S. By Year 1930

Predicting an expenditure of \$450,000,000 for radio by the "fans" of the nation during 1925, experts have estimated that by 1930 there will be 10,000,000 receiving sets in operation in the country. Five years ago, approximately 12,000,000 was spent for apparatus, and last year the amount had increased almost 175 times that figure. In 1923, there were 175,350 sets in use on the farms, and one year later the number had more than doubled. At the beginning of the industry, all apparatus were assembled by the owners, but with the steady development of parts and booklets, the volume of ready-built instruments purchased increased until about forty per cent. are now sold ready to tune in. To supply the more than 4,000,000 homes now equipped with receiving sets, programs are broadcast from 563 stations.—Popular Mechanics.

Exvents New Motor Fuel

Bromine Used in Discovery Is Found

The new motor fuel recently invented in America, and known as ethyl-gasoline, has proved a great success, and is now being manufactured in large quantities. A curious position has been brought about through its discovery, as large quantities of bromine are required in its preparation, so much so that a world shortage is threatened. Bromine comes chiefly from the famous Stassfurt deposits in Germany, but there is a certain amount of it in sea water.

A floating factory has been made for the purpose of extracting bromine from the sea. This is a remarkable steamship which has been called the Ethyl. It will extract the bromine by a special process while at sea, producing it, it is hoped, as much as 100,000 pounds of bromine a month. This search for raw materials from the sea for providing power for industry is probably one of the most romantic developments of modern chemistry.—C. N.

DEBT FUNDING COMMISSION HAS LEFT FOR FRANCE

Washington.—The final formula of a tentative arrangement, which must be ratified by the French Government, was thrust into the breach to prevent complete collapse of the Franco-United States debt funding negotiations.

Thus, one week after Finance Minister Cailhau and his associates had laid down the first French proposal for funding their government's four billion dollar war debt they departed for Paris, taking with them a document intended only to fill the gap sufficiently to assure continuity of negotiations—even at long range.

The arrangement proposed by the United States debt commission as a final move would have France pay an annuity of forty million dollars a year for five years and would enable the two governments to continue consideration of a programme of final settlement to succeed the proposed temporary pact at its expiration. Further, it conceded that the annuity thus paid would be in lieu of all interest on the debt during the time it shall run, an interest charge of approximately one per cent a year.

M. Cailhau gave United States commissioners the hope that he believed the French Government would accept the agreement.

Greatest Undersea Craft

New British Submarine Has Left For Unknown Destination

London.—The British submarine X-1, declared to be the greatest undersea craft in the world, has left Chatham naval station for an unknown destination. Great secrecy has surrounded the X-1 since her keel was laid, and only a few short distance photographs of her have been revealed to the public.

It is shown, however, that the X-1 cost \$4,210,000 to build, displaces 3,500 tons, is 350 feet in length, carries a crew of 121 officers and men, and is capable of remaining submerged for two and a half days and of turning within her own length. This latter accomplishment is considered of great advantage both in attack and defence against the hitherto more mobile destroyers.

The speed of the X-1 is said to be exceedingly great, both on the surface and under water, than that of any undersea boat previously built. Naval men, clad at the submarine's successful trials, declare she represents a triumph for British naval engineering.

No Bootlegging in Wheat

North Portal.—A dispatch from Winnipeg in the Regina Leader a few days ago stated that the Canadian grain trade was being "bootlegged" across the border to U. S. ports. As far as this part of the boundary is concerned it is believed by government officials that no bootlegging is being handled, though the price on the U. S. side has for some time been from 16c to 18c a bushel higher.

Nova Scotia Has Big Deficit

Halifax.—The Halifax Herald in its news columns says: "Deficit on current accounts of two millions, possibly more, a gross debt that may reach \$38,000,000; these are the appalling figures that face the people of Nova Scotia for the fiscal year 1925, which closed Sept. 30, according to statements by Hon. G. S. Harrington, acting premier and provincial secretary-treasurer."

Delayed By Bad Weather

Spaulding, Italy.—George H. C. Smythe, Canadian Canadian paddling from Naples to Leningrad, Russia, on a voyage of 10,000 lire, has been forced to put into Porto Venere Roads because of bad weather. Smythe left Naples August 18 on his present voyage. He recently paddled from Dover to Rome.

No Crop Failures

Winnipeg.—Not one crop failure in the province of Manitoba during the 1925 season, is the report of the provincial department of agriculture. Wheat averages 18½ bushels to the acre and oats 44.

To Probe Sub, Sinking

Washington.—A court of inquiry was appointed by Secretary of the Navy Wilbur to inquire into the sinking of the submarine K-5 off Block Island. It will meet at the Boston navy yard on October 15.

To Vote At 93

Winnipeg.—Ninety-three years of age, Catherine Coleman has registered her name on the list of electors for the coming election.

W. M. U. 1927

American Editors Interested

Trip Through Western Canada Described By R. J. C. Stead

Ottawa.—What proved to be most interesting to a group of American agricultural editors in a trip they took through the Canadian west recently were the prairie flowers, the public buildings, the government experimental farm at Brandon, Man., evidence of over-operative merchandising, grain elevators, dairying, natural gas at Medicine Hat, the irrigation scheme at Brooks, Alta., and the ranch of the Prince of Wales. So stated R. J. C. Stead, director of publicity for the Department of Immigration, in addressing the Rotary Club here. Mr. Stead accompanied the party of editors on their trip. The enormous crops seen en route by the two subjects of his admiration by the visitors, Mr. Stead said.

Church union was among the matters upon which inquiries were freely made by the American editors, also the enforcement of liquor laws.

Says Disaster Could Have Been Avoided

Accident to Shenandoah Is Blamed on Chief Officer

Jakobshavn, N.J.—The disaster to the ship Shenandoah was "entirely and very easily avoidable," Captain Anton Heden, former German Zepplin pilot, declared before the naval court of inquiry here.

"Does your criticism apply to the handling of the ship on that occasion?" asked Rear-Admiral Jones, president of the court.

"It does," Heden said.

"Whom do you hold responsible?" Heden paused. "I hold responsible the man in charge of the ship during the flight," he finally said.

To Prevent Smuggling

Steps Taken to Curb Liquor and Smuggling Traffic

Ottawa.—Regulations for the suppression of smuggling between Canada and the United States approved recently by the governments of the two countries, were made public tonight. Provisions are announced to prevent clearances of small motor boats and similar craft for points in Cuba or Mexico, where it is suspected that the cargo is intended to be smuggled into the United States or Canada; and for the exchange of information regarding persons engaged in the narcotic traffic.

Estimate of Wheat Crop Higher

Regina, Sask.—Saskatchewan's wheat crop, now that threshing is well advanced, is turning out far better than originally was estimated as late as August 12, wheat men said.

E. W. Beatty, chairman and president of the Canadian Pacific Railway, in an interview here, placed the crop now being taken in at this province at 240,520,780 bushels.

His estimate in early August, was 208,000,000 bushels.

Communism Rampant in England

New York.—Lady Coward, president of the British Women's Patriotic League, and wife of Sir Henry Coward, inter-parliamentary union delegate, said that British Communists have established Sunday Schools throughout England for the purpose of undermining the faith of children in God and the government. Communism, she said, is stronger in England than in almost any other European country.

Will Break All Records

Winnipeg.—"Without a doubt all previous records for the movement of grain from the head of the lake will go by the boards this season before freeze-up," said L. H. Boyd, chairman of the board of grain commissioners, who is enroute west to inspect elevators. Mr. Boyd also expects Vancouver to get a good share of the 1925 crop.

The Argentine Navy

Buenos Aires.—It is reported that the Argentine Senate in secret session has given its assent to an expenditure of 75,000,000 gold pesos for armaments and repairs to the Argentine navy. A bill providing this expenditure recently was sent to Congress by President D'Avalos.

Irish Visitor Is Assaulted

Philadelphia.—Richard Mulcahy, minister of defence in the Irish Free State, was struck in the face by one of a group of men and women at a departmental ball, while visiting the building with other members of the inter-parliamentary party. About fifteen arrests were made.

Canadian Professor Chooses

Toronto.—Prof. W. P. M. Kennedy of the University of Toronto, has been chosen one of the editors of a monumental eight-volume history of the British empire, planned by Cambridge University.

Child Welfare Conference

Divergent Views on the Question of Juvenile Immigration

Ottawa.—Charges against conditions of juvenile immigration were freely flung at the Child Welfare conference here. A rough division of the speakers for and against would place the representative of the Barnardo Homes, Percy Roberts and those of the department of Immigration on one side while provincial agencies in charge of delinquent children, social workers, both professional and voluntary, and at least one mental expert ranged themselves against juvenile immigration as it had been conducted. The result was that the Child Welfare Council proposed to conduct an impartial survey of a given number of such immigrants over a period of years.

Mitchell Launches Charges

Delivers Verbal Bombshell At U. S. Investigation

Washington.—Condensing all of his previous charges into one verbal bombshell, Col. Wm. Mitchell conducted his testimony before the president's air board by charging the navy with "amateur bungling" of its last three major aeronautic projects.

In rapid succession, the former assistant army chief told the board that incompetency and mismanagement by the navy sent the dirigible Shenandoah to its doom as a "propaganda mission" to the middle west, that tropical type planes were given navy fliers with the MacMillan Arctic expedition and that the Hawaiian flight was attempted with a gas supply known to be inadequate.

OPPOSE MOVE TO RESCIND GRAIN RATES TO WEST

Ottawa.—G. G. McGeer, K.C., counsel for British Columbia, maintained before the railway commission, in opposing the application for rescission of the McKenna-Clayton order on westward grain rates, that under that order the railway companies would gain rather than lose. He asserted that the rate for a 400-mile haul to Vancouver was 21 cents, while on a 1,300-mile haul to Fort William it was 28 cents. Without going into the point at this time, Mr. McGeer declared that the rate to Vancouver should be 15 cents instead of 21 cents.

The railway companies, Mr. McGeer argued, should be pleased with Vancouver's effort to relieve them of the long unprofitable haul from Alberta to Fort William. The westward traffic would be more profitable to them. He contended also that removal of discrimination against Vancouver would bring to Canada business now going to Buffalo and to American railways.

The British Columbia counsel declared that the grain trade under Vancouver was being seriously disrupted through not knowing what the rate would be and he asked that the application be dismissed at once. If the board could not see its way clear to dismissing it, at least a decision, whatever it was, should not be delayed.

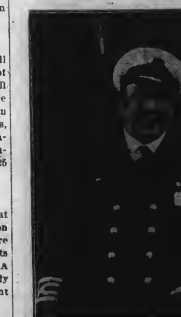

Wheat Pool Grows

Regina.—If the present flow of contracts to headquarters is maintained the Saskatchewan Wheat Pool will have ten million acres of wheat under contract by Christmas. The estimated acreage sown to wheat in Saskatchewan this year is 12,007,711 acres, while up to the end of September there were 67,601 contracts in the pool covering 8,118,348 acres.

Dunning Invited To Ottawa

Ottawa, Ont.—Premier King's announcement that after the election when further cabinet re-organization is effected he will invite Premier Dunning to come into the cabinet, conforms to the gossip here for some time. The addition of such men as Hon. Vincent Massey and Mr. Dunning would further strengthen the cabinet already revitalized in recent weeks.

New Canadian Prima Donna

This is Miss Loretta McEwen, soprano, chosen out of a hundred Canadian competitors, as possessing the greatest possibilities for an operatic career. With her is Captain Cleve, of the Canadian Pacific liner Melita. Miss McEwen is on her way to Paris to study her art, under Madame Pauline, world-famed contralto.

The competition in which Miss McEwen was successful, was held recently in Montreal. Voices from all over the Dominion were heard by Madame Donalds, who adjudicated.

Miss McEwen possesses a soprano voice of great range and power, is a good actress, well educated, speaks French and English fluently and is conversant with Italian and Spanish. Madame Donalds has expressed the opinion that there is a great career before the singer just brought into the limelight.

Miss McEwen is the daughter of Mr. William McEwen, of Outremont, Montreal. On her father's side the descent is Scotch, and on her mother's it is French. "I hope I shall bring credit to Canada," were her farewell words to friends seeing her off on the Melita, which sailed from Montreal.

MANY CHARGES ARE LAID AGAINST FRUIT CONCERNS

Vancouver.—Eight hundred and sixty-three charges involved in an indictment of 16 counts against 42 fruit firms and 11 individuals in British Columbia, Alberta, Saskatchewan and Manitoba, were handed to the grand jury at the assize court here this afternoon by Mr. Justice D. A. McDonald, presiding judge.

Theft, fraud, falsification of books for purposes of deceit, market juggling and price manipulation, restraint of trade, interference with sound business competition, syndacating and general conniving to cheat the grower and the consumer, with various injury to the fruit growing industry in Canada, are contained in the charges.

Trial of the fruit interests of Western Canada in Vancouver will take place at the instigation of the federal department of Justice.

The jurisdiction of the court has been extended to cover territory ranging from the coast to Winnipeg, and J. C. McElroy, Toronto lawyer, has come to Vancouver to prosecute for the crown. The indictment will remain with the grand jury. It is expected, for several days before a bill is returned.

Probes Alleged Communist Plot

Hungary Investigates Report That Budapest Officials Would Be Assassinated

Lisadopol, Hungary.—The police have concluded their investigation of the alleged Communist plot to assassinate leading officials and establish a dictatorship in Hungary, and forwarded their report to the public prosecutor. More than 100 persons were arrested in the city for alleged connection with the plot.

The police now are searching for three Communists, suspected of having brought a large sum of money in dollars into the city to carry out their machinations. The identity of sixty of those arrested have been verified. Photographs of the leaders, together with a detailed report of the plot will be sent to all foreign police authorities.

Time Is 113 Days From Seeding To Late-harvest Delivery

Saskatoon.—Just 113 days after he put the seed in the ground, wheat grown on the farm of Dr. Clearwater, near here, has been plucked at Fort Arthur. Mr. Clearwater began his threshing operations May 17 of this year and finished threshing August 28. His grain had been unloaded at the lakehead September 7. The wheat, which was sown on spring ploughland, yielded 21½ bushels to the acre. Mr. Clearwater declares this is a new speed record for Canada.

URGENT EXTENSIVE DISSEMINATION OF EMPIRE NEWS

Melbourne, Australia.—After a lengthy discussion, the Imperial Press conference passed a resolution urging the more extensive publication of news of the empire in the press of Great Britain and the British dominions. This resolution was introduced by Sir Hugh Denison, former member of parliament for Adelaide, South Australia, and chairman and managing director of the Sun Newspaper Limited. The resolution as carried included an amendment to the effect that all members of the conference pledge themselves to the practical encouragement and increased publication of inter-empire news.

The delegates to the conference listened with great interest to the address by J. H. Woods, of the Calgary Herald, president of the Canadian Press, on the system of coordination of news gathering and distribution of that organization. Mr. Woods suggested that the experience of successful operations of the Canadian Press would be found useful by the news papers in other parts of the British empire. He described briefly the wire transmission system of the association, and what he is president and also efforts made to extend its news gathering service.

Mr. Woods stressed the fact that the dominions had a duty not only to the empire but to the duty of Great Britain to all the dominions, and he announced amid applause that negotiations were in progress for the exchange of more news between Canada and Australia and New Zealand by cable and mail.

Australian Treaty Becomes Effective

Canada Gets British Preferential Rates On Certain Articles

Ottawa.—The Australian trade treaty became effective Oct. 1. It went into effect in Canada and Australia simultaneously, and Canadian dealers in commodities affected by the rates provided for in the new treaty have been notified.

Under the new agreement, Australia gives Canada British preferential rates on certain articles, and inter-mediate tariff rates on other commodities.

Canada grants to Australia special rates on a number of articles, including raw wool and dried currants. These rates are in addition to the tariff while under the general tariff they are subject to a duty of three cents a pound.

Send Greetings To Press Conference

Canadian Publishers Broadcast Message to Melbourne, Australia

Pittsburgh.—Canadian greeting to the Imperial Press conference meeting in Melbourne, Australia, were broadcast Sept. 30 from Station KDKA by means of a short wave relay. The messages were to be heard at the evening session of the conference owing to the difference in time, by means of loud speakers.

The greetings included messages from Lord Atholstown, owner of the Montreal Star; Hon. Simon White, of the Montreal Gazette; and Hon. P. R. Du Tremblay, La Presse, Montreal.

Plot Against King George Is Denied

Scotland Yard Says Report Is Absolutely Without Foundation

London.—Concluding their holiday at Balmoral, King George and Queen Mary have returned to Buckingham Palace. A published report that an attempt to assassinate the British royal couple had been revealed to Scotland Yard was characterized by officials of that organization as a "flat canard." The home officials also told the United Press that the report was "absolutely without foundation."

Rapid Growth Of Wheat

Time Is 113 Days From Seeding To Late-harvest Delivery

Saskatoon.—Just 113 days after he put the seed in the ground, wheat grown on the farm of Dr. Clearwater, near here, has been plucked at Fort Arthur. Mr. Clearwater began his threshing operations May 17 of this year and finished threshing August 28. His grain had been unloaded at the lakehead September 7. The wheat, which was sown on spring ploughland, yielded 21½ bushels to the acre. Mr. Clearwater declares this is a new speed record for Canada.

New Postage Stamp Issue

Canadian Stamp of Eight Cent Denomination Is Available

Ottawa.—A new Canadian stamp of the 8 cent denomination will go into use Oct. 1, following a decision reached at the recent international postal conference, held at Stockholm, to the effect that the postage rate on letters between countries of the union should be reduced from 10 to 8 cents. This stamp is of the same design as the 10 cent postage stamp, and will be blue in color.

The post office department is also about to issue the first of a series of Canadian historical stamps. The new series will include a stamp containing the portrait of Baldwin and Lafontaine, and the second containing the portraits of Sir Wilfrid Laurier and Sir John A. Macdonald.

A Unique Trail

Anchorage, Alaska.—A tree trail, 500 miles long, stretches across the bleak Alaskan hills as a tribute to the natives' ingenuity. The trail was made by scaling willow poles, which took root and grew into trees. Every now and then along the route native characters and English words denote distances from various camps and villages.

Floods in Tokio

Tokyo.—Another severe rainstorm swept Japan, flooding many thousands of houses in Tokio and other cities. Several were killed and injured by landslides. The water entered the Imperial Hotel, Tokyo, shutting off all the lights and water supply temporarily.

Market Over Hundred Million Bushels

Winnipeg.—More than 100,000,768 bushels of wheat, 80 per cent of which has graded contract, has been marketed in the prairie provinces during September, according to railway reports. This is a record movement.

Turks Are Recruiting

Constantinople.—Four classes of recruits, ranging from the ages of 22 to 25 years, have been called to the colors. The officers of the first and second reserves are to undergo medical examination.

Roosevelts Cross Himalayas

New York.—Cool Theodore Roosevelt and his brother Kermit, on an Asiatic big game hunting expedition, have successfully crossed the passes of Himalayas and are in Turkestan.

INCREASING THE TARIFF ON COAL CROPS UP AGAIN

Some supporters of high tariff in Coleman, and other parts where coal mining is the chief industry, are advocating the placing of additional duty on coal coming into Canada, stating that by so doing wages would be increased and more work available for the Canadian miner.

Just in this connection it is interesting to note that according to Mr. H. H. Stevens, a strong supporter of Mr. Meighen—speaking in Fernie last week, stated that he had wired to Hon. Arthur Meighen to ascertain if he (Mr. Meighen) had made the statement, that if elected to power he would impose a duty of \$2.00 a ton on all coal imported into Canada. Mr. Meighen's reply was an emphatic denial that he had ever made any such statement.

Mr. Meighen is apparently well aware that if a duty of \$2.00 a ton or any like amount is placed on American coal coming into Canada, the same amount of duty automatically goes into effect against Canadian coal shipped to the United States, and realizes that this would shut British Columbia and Nova Scotia mines from their market in the States. Their only market then would be the already overcrowded home market in Canada, and could not possibly make for betterment in an industry now suffering from over development.

The \$2.00 a ton duty could not secure the Ontario market even for the domestic coal fields, as the difference between what coal can be laid down for in Ontario from the domestic coal fields of Alberta and what it can be laid down for in Ontario from the Eastern States is double the additional duty in favor of American coal.

The leaders of both political parties in Canada are well aware that there is nothing to be gained by increasing the duty on coal, and despite what some people may say, you can bet a new hat that whatever party is in power after Oct. 20th, the coal tariff will be reduced in just about where it is today.

Mr. Irvine's complaint that the old political parties try to arrange the boundaries of constituencies in such a way that Labor has difficulty in electing members is not true either in the case of his own federal constituency of East Calgary or the provincial constituency of Rocky Mountain. The provincial Liberal government

in laying out the boundaries of Rocky Mountain made it comparatively easy for the labor vote in the mining centres, then existing in Alberta, to combine and elect a Labor representative. No unbiased individual will deny the truth of that statement. Neither has Mr. Irvine's chances of re-election in East Calgary been jeopardized by rearrangement of boundaries. The townships taken off East Calgary seat and placed in Bow Valley contain farmers, who have thus been given the opportunity of voting for a farmer candidate. The very thing he advocated in his address here on Monday. Where is the unfairness?

TARIFF, OUR HEAVIEST BURDEN.

The tariff, despite Mr. G. G. Coote's effort to make light of it, is the heaviest form of taxation borne by the people of Canada. Every manufactured article protected by the tariff is a tax on the consumer, and it does not matter whether the article in question is manufactured in Canada or imported, the consumer pays the cost of production plus the tariff. It is only necessary to mention one manufactured article to show how it works.

The Ford touring car sells f.o.b. Detroit for \$290. The same car manufactured at Ford, Ontario, on which no is collected by the Canadian government, sells f.o.b. Ford for \$435. The \$145 goes into the manufacturers pocket. This does not only apply to automobiles, but every manufactured article from pins to pianos. A Tariff law is as unchanging as the law of gravitation and like the law of gravitation it only works the one way, increasing the cost to the consumer of every manufactured article that he buys protected by the tariff.

Capitalism Breeds Itself

In New York a large fund set aside to fight capitalism doubled itself with capitalistic investments. This does not necessarily prove inconsistency on the part of the man who furnished the money, but it does go to show that the very system sought to be abated is a living, growing, vital force.

When we can disassociate the term "capitalism" with fat magnates and perfumed queens and apply its economic principles to humble investments and modest savings, it will claim greater respect from the common man and will demand less abuse from the purveyors of revolutionary propaganda.

Cooperation and Economy

If a man started out to manufacture a watch all by his own efforts and at his own expense, digging in the mines for the jewels and metal, melting metals for the glass, and fashioning the case and springs by his own handwork, it has been estimated that the materials, labor and tools for the making of an ordinary twenty dollar watch would amount to \$2,000,000.

If, therefore, alone and unaided, one should try to develop his community or his private business without the support and cooperation of his fellow citizens, he would foolishly waste a lifetime of effort at the job. Boded down, civilization is cooperation in all good works.

Mr. Coote, in his address to the electors in Coleman on Monday, said the tariff was not very important. Will he tell the same story to his farmer supporters who know that by reducing the tariff on agricultural implements in 1923 and 1924 binders cost from \$20 to \$30 less in Canada?

At election time high tariff advocates profess a sudden solicitude for the wage earner. There is evidence, however, that the wage earner is increasingly recognizing the tariff as a tax, pure and simple.

"All I can say is that I am confident of the ultimate result," remarks Hon. Arthur Meighen on the federal election outlook. The Conservative leader expressed himself in the same vein prior to the voting in 1921.

"The higher the customs duties, the higher will be the cost of living," is a truism that even all of R. B. Bennett's eloquence cannot alter.

Why don't some wise fellow run for office on a platform of more places to park?

The Elizabeths of 1926 are, no class they are not on honking terms with the Lizzies of earlier models.

Being "for" something doesn't mean much unless your hand goes down in your pocket at the same time.

Morality is getting to be whatever some national organization for this and that pronounces it.

Who remembers when nobody but men rode in the smoking cars? Boy, then was the days.

They're making dresses longer but that's no sign they will last longer.

Some people are pure and simple; others are impure and complicated.

When a fellow gets lots of long green he doesn't stay green long.

The most expensive thing about the house is the expenses.

Why because you work!

Pop Up Your Lodge Meetings
100 humorous STUNTS and Stars in Speeches, for Lodge, meetings, parties. Book of 100 Live Ideas for Entertainment Committee. Tested and approved. Endorsed by leading organizations.

Standard Book. Laughs, pep, tricks, speeches—so anything, just things you come out on meetings and parties that the whole crowd will talk about. NOW! Keep your mind sharp with the process of stimulation. Put your pop up in your meetings and parties. Have something doing every minute. Here is the Summer Home of Mister Jack Frost Himself

THIS is the Ice Cave in Mount Sir Donald, near Glacier, B.C. The light of the sun streams in through the opening at the far end causing the frozen walls to glisten as though built of a thousand times ten thousand diamonds. It is rumored that this is the official summer residence of Jack Frost himself, to which the Chilly Monarch retires for his annual nap from spring time to autumn.

And this is a scene from Mr. Frost's private grounds, on the roof of the world in the Canadian Pacific Rockies. It is here, so we understand, that Mr. Frost spends most of his time when not asleep in his Cave. For a pastime he enjoys most of all riding around on chunks of floating ice and his favourite food is a good, deep crackly glacier which he prefers coated with a generous frosting of newly fallen snow. When the winter comes and the nights are long and dreary he lets out a wild whoop of joy (so we are told), jumps on a passing snow cloud and sails away over the continent, pushing down mercuries and heaping up snow drifts wherever he goes.

But after all, nobody takes him very seriously these days, for it would be a tiresome old world to live in if Friend Frost didn't come along once in a while and give us something to contrast with the summer.

A Chain of Contacts

If you, as a merchant, could be constantly meeting new prospective customers, you could keep your business healthy and flourishing without advertising.

But the main reason why ADVERTISING is a sound; paying investment is because it does this missionary work for you, constantly, efficiently, at low cost, and leaves you free to render personal service and plan further business developments.

Look into the value to you of advertising in The Coleman Journal from a business-building point of view. Talk it over with us.

BARRE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.
"BARRE, SON OF KAZAN," a Vitaphon Picture, With Wolf, the War Dog.
Is an Adaptation of This Story

SYNOPSIS

Bush McTaggart, the factor of Post Macdon, a brutal and unscrupulous schemer, was determined to marry Nepeese, the beautiful Indian "princess," daughter of Pirotto, the trapper. He had tried of Marie, the slim Cree girl who had been his companion. Nepeese's advances were distasteful to Nepeese and around the equality of her father, to do away with Pirotto, it necessary, to win his daughter for himself.

CHAPTER XI.—Continued.

He chuckled again as he made his way through the darkness to the door. Nepeese as good as belonged to him. He would have her if it cost Pirotto's life. And why not? It was all so easy. A shot on a lonely trap line, a single knife-thrust—and who would know? Who would guess where Pirotto had gone? And it would be all Pirotto's fault. For the last time he had seen Pirotto, he had made an honest proposition: he would marry Nepeese. Yes, even that. He had told Pirotto-as he had told his father-in-law, he would pay him double price for furs.

And Pirotto had stared—with that strange, stunted look in his face, like a man who had been hit by a club. And so if he didn't get Nepeese without trouble it would all be Pirotto's fault. To-morrow McTaggart would start again for the half-breed's country. And the next day Pirotto would have an answer for him. Bush McTaggart chuckled again when he went to bed.

Until the next to the last day Pirotto said nothing to him. He had passed between him and the factor at Lac Baun. Then he told her.

"He is a beast—a man-devil," he said, when he had finished. "I would rather see you out of this world, here dead."

And he pointed to the tall spruce under which the princess mother lay.

Nepeese had not uttered a sound. Her eyes had grown bigger and darker, and there was a fire in her cheeks which Pirotto had never seen there before. She stood up when he had done, and she seemed taller than he. Never had she looked quite so much like a woman. Her eyes were deep shadowed with fear and her eagerness as he watched her while she gazed off into the northwest—toward Lac Baun.

That was wonderful, this slip of a girl-woman. Her being trapper's daughter. He had seen the look in Bush McTaggart's eyes. He had heard the thrill

MRS. B. H. HART SICK FOR YEARS

Wants Women to Know How She Was Made Well by Lydia E. Pinkham's Vegetable Compound

Cornwall, Ontario. "I am now giving your medicine a fair trial and it surely is doing me good and much like to keep me on taking it. I used to feel so tired in the morning that I didn't want to get up, but that feeling is leaving me now. I also sleep better and feel like I'm working. For seven or eight years I have had headaches, dizziness, pains in my back and across my body. I read letters in the newspapers saying what good it was to others. My husband says I quit took so soon, but I am not going to stop taking the Vegetable Compound and Lydia E. Pinkham's Blood Purifier. It is a better and haven't an ache or a pain. Isn't that the right way? I have great faith in your medicine. They must be good when those who take them speak so highly of them. I am recommending them to my friends and I will gladly answer letters from women asking about them."—BURE H. HART, Box 1031, Cornwall, Ontario.

Mrs. Hart wants to help other women who are willing to answer letters from sick women asking about the Vegetable Compound.

Most Northerly Police Post

Will Be Constructed Next Year On Ellesmere Island
The world's most northerly police post and also the most remote of any human habitation, is to be constructed next year for the Royal Canadian Mounted Police at the far end of Ellesmere Island. Building materials and two years' supplies have been cached within easy reaching distance of the point. Three men will be detailed to patrol duty on the indescribably lonely shore of Eke Strait.

AFTER EVERY MEAL
WRIGLEY'S
makes your food do you more good.

Note how it relieves that stuffy feeling after heavy eating. Sweetens the breath, removes food particles from the teeth, gives new vigor to tired nerves. Comes to you fresh, clean and well-flavored.

SEAL TIGHT
KID RICHY

or other moment or two of hesitation he started upon his prey.

McTaggart had heard no sound, for the snare into which Wapoose had run his head was the one set farthest from the camp. Beside the smoldering coals of his fire he sat with his back to a tree, smoking his black pipe and dreaming reverently of Nepeese.

Barre continued his night wandering. Barre no longer had the desire to hunt. He was too full. But he nosed in and out of the starlit spaces, enjoying immensely the stillness and the golden glow of the night. He was following a rabbit run when he came to a place where two fallen logs laid a trail no wider than his body. He squeezed through; something tightened about his neck; there was a sudden snap—a swirl, as the sapling was released, from its "trigger"—and Barre was jerked off his feet so suddenly that he had no time to conjecture as to what was happening.

The rope in his throat died in a gangle, and the next moment he was going through the pantomime actions of Wapoose, who was having his vengeance inside him. For the life of him Barre could not keep from dancing about, while the wire grew tighter and tighter about his neck. When he snapped at the wire and flung the weight of his body to the ground, the sapling did bend obediently, and then—in its rebound—it snaked back for an instant completely off the earth. Furiously he struggled.

It was a miracle that the fine wire held him. In a few moments more it must have broken—but McTaggart had heard him! The factor caught up his blanket and a heavy stick as he hurried toward the snare. It was not a rabbit making those sounds—he knew that. Perhaps a silver-rat—a lynx, a fox, a young wolf—

It was the wolf he thought of first when he saw Barre at the end of the wire. He dropped the blanket and raised the club. If there had been clouds overhead, or the stars had been brilliant, Barre would have died as surely as Wapoose had died. With the club raised over his head McTaggart saw in time the white star, the white-tipped ear, and the jet black of Barre's coat.

With a swift movement he exchanged the club for the blanket. In that hour, could McTaggart have looked aside to the days that were to come, he would have used the club.

Half an hour later, when McTaggart's fire was burning brightly again, in the glow of it Barre lay crumpled up like an Indian pappoose, tied into a balloon-shaped ball with his hands thrust, his head alone showing where his cap had cut a hole for it in the blanket.

He was hopelessly caught—so closely imprisoned in the blanket that he could scarcely move a muscle of his body. A few feet away from him McTaggart was building a bleeding hand in a basin of water. There was also a red streak down the side of McTaggart's hutless neck.

"You little devil!" he snarled at Barre. "You little devil!"

He reached over suddenly and gave Barre's head a vicious blow with his heavy hand.

"I ought to beat your brains out—and I believe I will!"

Raised Town Five Feet

Old Engineering Feet Has Been Accomplished at Northwich, England

Shifting houses bodily several miles, and in some cases raising the level, has often been done, but raising a town five feet is something new. This is claimed to have been accomplished by the surveyor of Northwich, England, in just under three years. The entire business portion of Northwich, including town streets, three banks, the county court and 200 stores and houses, have been raised to counteract the effect of subsidence caused by the brine pumping, which proceeds continually in the salt mines under the town.

There has been no stoppage of business and only eight buildings, including an ancient inn, have had to be demolished because they could not be safely lifted.

In raising operations, parts of the lower brickwork were removed and small hydraulic jacks inserted. Chamberlains' stores were lifted so carefully that not one bottle was disturbed. The town bridge was raised five feet at each end to bring it up to the new level of the town.

"DIAMOND DYES"

COLOR THINGS NEW

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in ribbons, skirts, waists, dresses, coats, stockings, dresses, draperies, coverings, hangings—everything!

Try Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

The Westward Flow

Vancouver hopes to ship 100,000 bushels of this year's crop. This would about double the city's previous record in grain shipments. Six years ago Vancouver was not shipping a bushel of grain.

Other cities on the coast will participate in grain shipments as they acquire the necessary facilities. This is the purpose of the Canadian and the awakening of the first stage of the flow of trade—financially put.

MAKE CARE OF

BABIES EASIER

Baby's Own Tablets Are a Great Help to Mothers of Young Children

Stomach disturbances and constipation are responsible for much of the peevishness of babies. Modern mother does not resort to so-called soothing mixtures, but corrects the trouble by administering the little white tablets, giving a gentle laxative that acts without griping. Such a remedy is found in Baby's Own Tablets, easy to take and guaranteed to be free from opium or narcotics.

Every mother who tries Baby's Own Tablets becomes enthusiastic about them. Mrs. Oscar Adler, Holyoke, Mass., says: "I have used Baby's Own Tablets and think them a splendid medicine for constipation and other ailments which affect little ones. I have no hesitation in recommending them to my mother." Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont. A little booklet, "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

Many Rural Phones

According to the annual report of the government telephone service, there are two rural telephone subscribers to every urban subscriber in the province of Saskatchewan, a situation which is found in only four states in the United States.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Extirminator.

"Why were you so willing to send your wife back to her old home town for a visit?"

"Oh, I wanted her to get a good look at some of the men she could have married."

A girl's features may be stamped on a man's heart, but it's her complexion that looms up on his coal collar.

You can't judge the size of a man's brain by the amount of noise he makes.

No Recipe For Longevity

Centenarian in England Has Never Had a Day's Illness

Not one single day's illness has been experienced by John Large, of Hampton-in-Arden, England, who has celebrated his hundredth birthday. He has no recipe for longevity. "Why me," he confesses, "it's just happened, and I don't know how. Maybe it's because I never learned to smoke. I've always said I never made it a rule never to drink more than one glass of beer at once."

Mr. Large is one of twins, his brother living until he was 79. He started work at fourteen in London, whether he travelled by road, or whether he travelled by sea, he has been many things in his time, including stationmaster and farmer. Eight of his nine children are living. The oldest being 72 and the youngest, 53. He says he can still "walk, as do his youngsters of their legs."

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Child Immigration

Commissioner Lamb Urges Canadians To Adopt English Children

Advocating the adoption by Canadians of young English children, Commissioner David Lamb, of the Salvation Army, in an interview in Toronto, stated that there was a great number of young children, perfectly healthy, whom England could send out to the Dominion.

Commissioner Lamb is in charge of the Salvation Army's immigration and social work all over the world, and he is touring Canada conferring with provincial governments in the interests of a greater influx of English people.

A Household Medicine.—They that are acquainted with the sterling qualities of Dr. Thomas' Eucalypti Oil in the treatment of many ailments would not be without it in the home. It is truly a household medicine and is effective in dealing with any ordinary complaint. It is an inexpensive medicine. So keep it at hand, as the call for it may come most unexpectedly.

An inn sign pointed on the blade-point of a whale is one of the curiosities of Haughton, Suffolk.

Mirand's Liment for Bone Back.

Traffic delays in London entail a loss to the community of more than \$20,000,000 a year, says F. G. Bristol, secretary of the Commercial Motor Users' Association.

Children Cry for

Fletcher's CASTORIA
MOTHER—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulence, Wind, Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of **Dr. J. C. Fletcher**. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Here and There

The output of silver from Cobalt during July amounted to about 400,000 ounces, according to preliminary estimates. This had a value of less than \$300,000, or at the rate of about \$3,500,000 a year.

All attendance records for the Central Canada Exhibition were broken this year. There was a total attendance of 342,000, or 42,000 greater than the previous record of 307,000, made in 1922.

The first Italian ship to visit Vancouver in several years will be the steamer Piave II, of the Navigazione Libera Trestina, due here at the end of this month. This boat will inaugurate a new service between this port and points on the Mediterranean.

Production of paper by the Powell River Company, at Vancouver, will be increased 80 per cent by completion of a \$5,000,000 development programme, now under way, according to an announcement made by M. J. Scanlan, a director of the company. At present the plant is turning out about 75,000 tons a year.

Signs of returning prosperity to Canada are evidenced by the fact that more Canadians are registered in the Canadian Pacific Rocky Mountain resorts during the past week than at any time since the beginning of the year. These resorts, which are usually filled almost entirely by Americans, contain a guest list last week which is 50 per cent Canadian.

Production of gold in Ontario for the first six months of this year amounted to \$14,506,219, as compared with \$11,810,080 in the corresponding period of last year, according to a report issued by the Provincial Department of Mines. Silver production increased from \$3,282,100 to \$3,732,662. Total mineral production was \$41,560,385, as compared with \$37,997,778.

made Welcome.

John Edwin Hoag and Frank S. Wilton, who travelled across the continent in a small motor-boat arrived recently in Montreal and moored their craft to Canadian Pacific Pier No. 8 having come from Astoria, Oregon, via Columbia River, Celilo Falls, Fort Benton, the Missouri and Mississippi Rivers, the Chicago Drainage Canal and Lake Michigan since May, 20th. From Montreal they continued their journey to New York and returned to the States, via Canadian Pacific Railway to Vancouver and Seattle in order to see the country.

The groundwork for what promises to be a big industry is now being developed by the Slinger Sewing Machine Company at Thurso, a point on the Canadian Pacific Railway, on the north shore line to Ottawa. It is planned by the Slinger Company to manufacture at Thurso all the woodwork required for their numerous plants in different parts of the world. Work on the new plant is being pushed with all possible speed and it is anticipated that shipments from Thurso will commence sometime early next year.

While the Canadian Railway Commission is besieged with all kinds of applications for reductions in Canadian freight rates, the Western group of railways in the United States is asking for a five per cent increase and the northwestern section of the group is asking more than that "as a measure of relief." Some of these roads are in the hands of the receivers. Yet these American railways already have higher rates than the Canadian roads, the freight revenues in the U.S.A. being 1,293 cents per ton mile on western lines as compared with 1,011 cents on all Canadian railways. The average American rate is 28 per cent above the average Canadian rate. Owing to the low grain rates in Canada, the C.P.R. average rate is 1,011 per ton mile, so that the average rate on American western lines is more than 30 per cent above the average C.P.R. rate.

Publicity Pictures

Motion pictures for distribution among the news reels in circulation were taken the past week to the extent of nearly 1,000 feet in the Edmonton district by representatives of film concerns. These included scenes on the farm of Lord Rodney at Fort Saskatchewan, and the Gillies farm at Clover Bar. Pictures were obtained of the titled students in farming from the old land who are working on the farm of Lord Rodney.

Alberta's Gas Production

For the first time in the province's history, Alberta has taken first rank among the provinces of Canada in the production of natural gas. The Dominion bureau of statistics report for the production for the first six months of this year states that Alberta's production during that period was 4,687,084 million cubic feet, with Ontario second with a production of 3,267,429 million cubic feet.

Exhibits for International

Two thousand farmers in the province are being notified by the Department of Agriculture of the forthcoming International Hay and Grain Show at Chicago, from November 28 to December 5, at which Alberta farmers have always been prominent exhibitors. Farmers who intend to exhibit this year are asked to have their entries into the Provincial Department of Agriculture by November 3rd, as all entries must be in Chicago by November 9. Exhibits are to be shipped to the seed cleaning plant of the Department at Edmonton from where the Department will pay freight or express to Chicago. The exhibits are to be in place in Chicago by November 23. The Department will also bear the expense of putting up the exhibits. The Department is offering again an honorarium of \$150 for each grand championship won by an Alberta farmer, and \$100 for each first prize.

Canada's Wool, Woollen and Knit Goods Industry at the C. N. E.

1. Mrs. Cockshutt, wife of the Lt.-Gov. of Ontario, looking at the exhibit of Canadian woolen goods, in which the Canadian Woolen Goods Association is exhibiting a complete line of garments and accessories, the wool being Canadian. The ensemble consists of a dress of grey cloth with a white collar and cuffs, a white blouse, a white skirt, a white hat, and a white bag. The dress is made of a fine, soft, and comfortable fabric, and is a perfect example of Canadian woolen goods.

2. His Honor the Lieutenant Governor of Ontario opening the exhibit of Canada's Wool, Woollen and Knit Goods Industry at the C. N. E. The exhibit is a large and well-arranged display of the products of the Canadian woolen industry, showing the various stages of production from the raw wool to the finished goods. The exhibit is a fine example of the skill and craftsmanship of the Canadian woolen industry.

3. The finished goods display, which showed that the completed goods looked like after being made on the machines making underwear and hosiery. It was a miniature representation of the work that is being done in over two hundred and seventy woolen and knitting mills in over one hundred and forty municipalities. The finished goods display, which showed that the completed goods looked like after being made on the machines making underwear and hosiery.
